

KORAFLEX TRENCH HEATERS

CHANGES

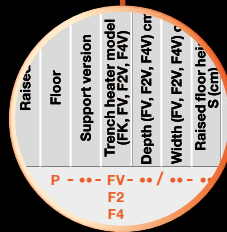

ALUMINIUM GRILLES AND FRAMES IN BLACK ELOX

Our so-far offered range of aluminium grille colours was extended by the attractive and currently popular black. All our aluminium grille and frame types are available in black now.

RAISED FLOOR SUPPORTS

Raised floor supports with improved stability are made of non-lacquered galvanized steel and – according to the trench heater type – are suitable for raised floors up to 500 mm deep.

ORDER CODES FOR RAISED FLOOR SUPPORTS

Due to necessary design alterations raised floor supports must be ordered together with the trench heaters. Note the change in the order code – now the trench heater type code is an integral part of the raised floor support order code.

SIEMENS RDG 260KN THERMOSTAT

Electronic room thermostat with LCD display replaces the so-far offered SIEMENS RDG 160KN. The new model features improved technical parameters and modernized design.
