**Direct WVD (24 V DC), Energy WVE (230 V AC),
Optimal-V WVO, Pool-V WVP**

LICON's primary focus lies in promoting sustainability and ecological integrity within the realm of construction, both for new developments and the revitalization of existing residential and industrial structures. With our extensive years of experience, we adeptly align ourselves with emerging environmentally conscious trends.

member of KORADO Group

KORAWALL Optimal-V WVO

An efficient, energy-saving heat pump convector with condensate-free cooling and a set of energy-efficient, high-performance fans with minimal power consumption.

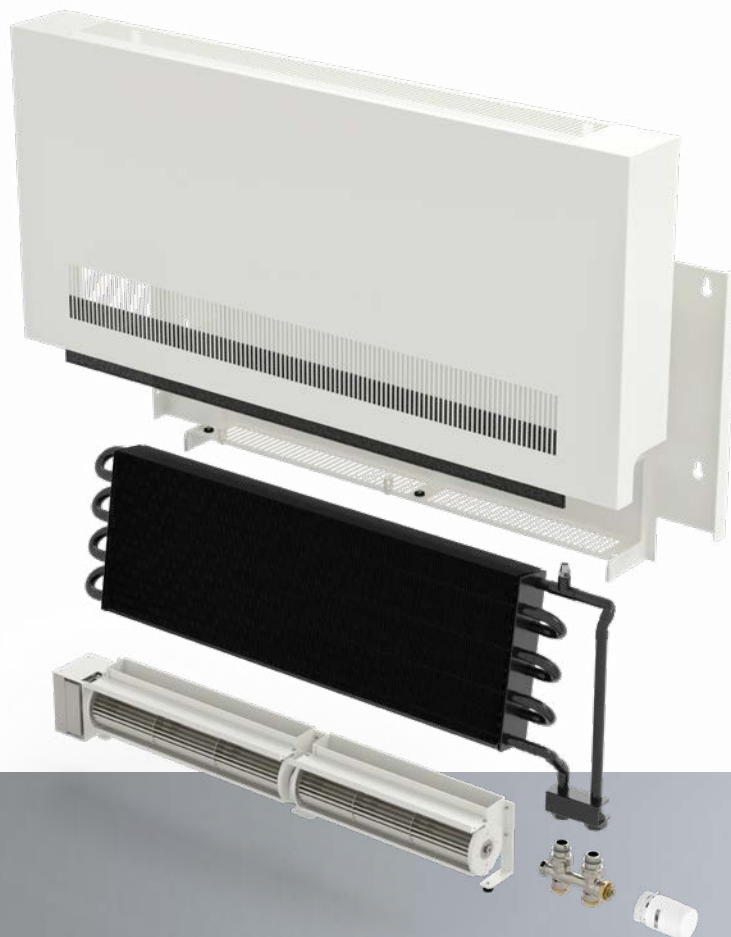

Lead time upon request.

- + 24 V DC
- + Low energy consumption
- + Ideal for heat pumps
- + BIM available

KORAWALL Pool-V WVP

An efficient, energy-saving stainless steel heat pump convector with condensate-free cooling suitable for humid environments.

KORAWALL Direct WVD

A wall-mounted heat pump convector, with autonomous control is a powerful device designed for low-temperature heating connected at 24 V DC.

Lead time upon request.

- + 24 V DC connection
- + Light cooling
- + Power transformer

KORAWALL Energy WVE

A wall-mounted heat pump convector, with autonomous control is a powerful device designed for low-temperature heating connected at 230 V AC.

- + 230 V AC connection
- + Light cooling
