

Basic diagram connection for convectors KORAWALL Energy WVE  
Heating or light cooling

Description:

- ① - control touchpad for fan RPM heating/cooling
  - ② - control unit
  - ③ - power supply 230 V AC/24 V DC  
= electric terminals for main grid connection
  - ④ - tangential low-energy EC fan assembly
  - ⑤ - regulation fitting connection – LM valve
- To - temp sensor (room)  
Tv - temp sensor (water)
